Perla Harghitei

NATURAL MINERAL WATERS • CARBONATED SOFT DRINKS

Sâncrăieni

Over 40 years tradition in bottling the natural mineral waters

The sources of natural mineral waters - bottled by Perla Harghitei S.A. are around Sâncrăieni, a village placed between two ancient volcanic mountain ranges: Harghita (1800 m) and Ciuc Mountains (1500 m). The area - called Lower Ciuc, is amazingly beautiful and extremely rich in mineral water springs. In Sâncrăieni only, there are more than 80 springs and wells.

The village of Sâncrăieni is located in Harghita County, along the Olt river, 650 m above sea level. The locality is 10 km from the county seat, Miercurea Ciuc. It was firstly mentioned in a letter issued by the Pope in 1332 and its consecrated name in latin is "Sancto Rege" (meaning The Holy King).

The unique natural setting guarantees the purity of the mineral waters. The waters springs from the volcanic region of the Harghita Mountains - one of the most well-know in Europe thanks to its abundance in natural mineral water springs. The Harghita Mountains are protected from any pollution, being far from hectic urban centers, industrial facilities or intensively used agricultural lands. This makes the area an unspoiled cradle of nature.

Mineral water bottling began in the village Sâncrăieni since 1952. The first factory, with a bigger capacity bottling lines was built in 1974, when production began under the brand name Perla Harghitei - the most important brand of the company - continously present on the market for over 40 years. Today, Perla Harghitei S.A. - the bottler of mineral waters Perla Harghitei, Tiva Harghita and Cristalina, respectively carbonated soft drinks Allegria, has 8 bottling lines, with a total capacity amounting to 650 million liters per year.
